Caesar Creek Software works with various government agencies to perform cyber research into major operating system platforms, software security products, personal computers, cell phones, and networking equipment. We specialize in offensive information operations, reverse engineering, vulnerability analysis, and exploit development. We have a robust Internal Research and Development program that lets us do cool stuff on our own. If it has a processor, we love taking it apart to see what makes it tick. Our company motto: "We void warranties!"

We offer a highly competitive compensation package including one of the best benefit packages in Ohio. United States citizenship is required for all positions, as well as the ability to obtain a high-level security clearance.

Internship opportunities are available in the following areas:
- Reverse Engineering
- Vulnerability Analysis
- Exploit Development
- Embedded Software Development
- Low-level programming in C or Python

Skills & Requirements

Experience in the following areas is required:

- C or Python programming experience

Experience in the following areas is a strong plus:

- Reverse engineering
- IDA Pro, Binary Ninja, Ghidra, radare, WinDbg, OllyDbg or other reverse engineering tools
- Security vulnerability analysis and exploit development
- Operating system internals
- Device driver development
- Assembly-level and embedded programming

Qualified candidates must have the following:

- Pursuing a Bachelor's Degree in Computer Science, Computer Engineering, or Electrical Engineering. Other majors or those without a college degree will be considered for the candidate with the desired skill set.
- U.S. citizenship and the willingness to obtain a high-level security clearance. A current Top Secret security clearance is highly desired!
